AMENDMENT

Sir:

Responsive to the Office Action mailed 29 August 2002, please amend the above patent application as follows:

IN THE SPECIFICATION

Amend all the paragraphs of the specification to read as given in the enclosed substitute specification. The substitute specification should therefore be substituted for the specification of the application as originally filed. To assist in distinguishing the substitute specification from the originally filed specification, the pages of the substitute specification are identified by page "numbers" beginning with the letter "S", e.g., "S1" and so on.

Further enclosed is a marked-up copy of the original specification in which all the changes to the specification are indicated in red.
